Appendix 1

A number of online materials and facilities are available to the reader of this volume and can be freely used at, or downloaded from, the GRID website at <http://www.affective-sciences.org/GRID>. These include:

- 1 Complementary information to the book chapters (tables, figures and additional documents too large to include in the printed volume). These are referred to in the respective chapters as Supplementary Materials (“SM”) and labeled according to their type as “Table,” “Figure,” or “Document” (e.g., Table SM 1).
- 2 Additional detail on the GRID collaborators and datasets. This includes updated information on:
 - languages in which the instrument is available
 - countries for which data has been collected
 - languages for which data has been collected
 - name and affiliation of all dataset owners and their teams
 - contact information for dataset owners

Please, note that the GRID is an ongoing project and more datasets are constantly being collected in new languages and countries.

- 3 Electronic versions of the instruments provided in appendices to this volume: the full GRID instrument (see Appendix 2), the CoreGRID instrument (see Appendix 3), the MiniGRID instrument (see Appendix 4), as well as a paper version of the MiniGRID instrument (see Appendix 5). The original version of the GRID instrument is reproduced in this volume (see Appendix 2); the online version will be continuously updated.
- 4 Translations of the standard set of 24 GRID words into all available languages

5 A continuously updated list of publications using the GRID paradigm

6 Errata—a listing of errors discovered after the publication of the volume

If you would like to use the GRID, the CoreGRID, or the MiniGRID instruments online, using the web experimentation platform of the Swiss Center for Affective Sciences, please send an email to GRID@unige.ch specifying your name and affiliation, discipline, the language and country you would like to gather data for, and your research goals. You will then receive further information on how to proceed. Please note that a license is required for commercial use of the instrument, so please specify exactly how you wish to use it.

If you use the paper version of the GRID instruments provided in this volume and downloadable from the site, please refer to these in your publications as “GRID instrument” (“CoreGRID instrument”/“MiniGRID instrument”) and include a reference to this volume and the link to our website (<http://www.affective-sciences.org/GRID>), from where the instrument has been downloaded.
